Custom Solution

One-Team

Executive Business Intelligence Platform

Clinical

Clinical teams can access Federal and State acuity models to make real-time decisions impacting the length of stay and expected care.

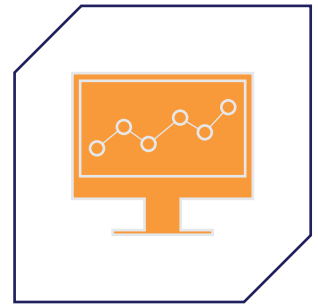

Business

Business departments are empowered with granular data, allowing them to make decisions that directly impact their bottom line.

Actionable

Real-time data drives actionable decisions offering a customized solution for every patient encounter.

One-Team

Clinical and business departments work together to allow hospitals to run more efficiently, provide ideal patient care and save financially.

Company History

Intero offers nationwide CDI consulting and staffing services to hospitals of all sizes. Intero's Executive Business Intelligence Platform **transforms EHR's** into first-in-class, functional CDI platforms. Eliminating the need to purchase third-party CDI software plug-ins.

Intero optimizes the capture of appropriate acuity, diagnosis, quality, mortality, risk adjustment, LOS, CMI, and other KPIs. With 30 plus years of experience we have clients with consistent return on investment being realized year over year.

Why Choose Us

- ✓ Create a first in Class CDI tool that is integrated across your healthcare system.
- ✓ The intelligence derived from Intero's tool uncovers weaknesses costing hospitals millions.
- ✓ Provide actionable data tools for Care Management, Quality, Finance & Providers **BEFORE** the patient is discharged.
- ✓ One-team. Build a cohesive and collaborative multidisciplinary team with one goal.
